

**AMENDMENTS TO THE SPECIFICATION:**

Please replace the paragraph beginning at page 3, line 4 with the following amended paragraph:

--For some applications, each fastener element head tip defines an entrance height, measured perpendicular to the sheet-form base below a lowermost extent of the tip, of between about 7 and 12 millimeters.--

Please replace the paragraph beginning at page 4, line 7 with the following amended paragraph:

--Each fastener element preferably has an overall height of between about 10 and 50 millimeters, measured from and perpendicular to the base.--

Please replace the paragraph beginning at page 4, line 9 with the following amended paragraph:

--Each fastener element head preferably has an overall height of between about 10 and 20 millimeters, measured perpendicular to the sheet-form base from a lowermost extent of the tip of the head to an uppermost extent of the head.--

Please replace the paragraph beginning at page 4, line 12 with the following amended paragraph:

--The height of the lowermost extent of the well is preferably between about 5 and 20 millimeters.--

Please replace the paragraph beginning at page 4, line 14 with the following amended paragraph:

--In some cases, each crook defines an overall crook height, measured perpendicular to the sheet-form base from a lowermost extent of the tip to an uppermost extent of the crook, of at least 6.0 millimeters.--
